

Price: € 48.00 (includes shipping)

The most handy and inexpensive Zapper you will find! It's so small that you can easily use it anywhere: at home, at work, while taking a walk outside, while sleeping etc. Moreover, it makes a perfect gift that will delight your friends with its originality and effectiveness.

[This model is manufactured in the U.S.A. by Indians of the Lakota tribe. By buying this Zapper you are supporting the effort for financial independence and for preserving the tradition of the Native American tribes. These particular Zappers are made according to Don Croft's instructions and it was he who urged us to favor them as the most economical and reliable solution.]

The history of the Zapper

The Zapper is a simple but very effective alternative detoxifying device that acts through electricity. Its construction is based on the long-term research of molecular biologist Dr. Hulda R. Clark, who has published her findings in the book "The Cure of all Diseases" as well as in other books that followed. Dr. Clark, just as many other researchers, discovered that the pulse of constant electric current kills parasites that are located inside the human body. These include all types of worms, bacteria, viruses and fungi, along with other pathogens.

The specific types of zapper we have available in our store are an inspiration of researcher Don Croft, who has also been a pioneer in the subject of Orgonite.

How it works

The Zapper can be used alongside with the treatment your doctor / physician has given you or as prevention, in case you feel that your body needs extra help to ward off an oncoming illness or simply to help it detoxify. Its use is very simple: you place the Zapper (using the side where the two copper protrusions are) on your skin so that it makes proper contact, and turn on the switch. First and foremost though, you need to have opened the device's plastic case and to have inserted a square 9V battery.

Place the zapper on any part of the body you want and for as long as you feel you need to.

When the battery is exhausted, you replace it with a new one and continue to use it as normal. (A plain 9V battery will last for about 40 hours whereas an alkaline one lasts for approximately 100 hours of using the zapper.)

Caution

- If you are wearing a pacemaker or if you are pregnant, avoid using the Zapper as its function is based on the transmission of 15 Hz electric current.

- Especially during the first few uses, it is recommended to not use the Zapper for more than 20-30 minutes at a time. This is because your body will initially have a lot more toxins and there is a chance of feeling a “burning” or “tingling” sensation on the point of contact with the device. This is the body’s normal reaction as it cleanses. Later on you can use it at will as often as you want.

- Furthermore, there is a chance of having some marks left on the skin by the Zapper’s copper contact points. This is nothing to worry about but it is an indication that the body is detoxifying. The marks disappear after a short while and the skin completely clears with a little soap and water.

- After some days of using the Zapper, the aforementioned discomforts from coming to contact with the device will completely disappear and you will only get them whenever your body will fill once more with toxins and parasites. In any case, diet as well as other environmental factors are the areas where we should focus on in order to have a good health.

Dimensions:

5.7 x 4.5 x 2.2 cm

Weight:

28 gr.

Extras:

It is accompanied by an elastic strap to easily fasten the device on your body.

(9V battery is not included.)

Note: Click once to add one product in your bag. You will be able to update the quantity or remove the product through Paypal's shopping cart.
